

COPY AUDIT

Copy Tracking & Cost Recovery

COPY AUDIT

Copy Tracking & Cost Recovery

Copy tracking and cost recovery at your fingertip.

Copy Audit Touch is comprised of a combination of software and hardware components.

Touch's software component can run on either Print Audit's Touch Screen Terminal or any computer running Windows 2000 or newer.

Save money by using your own computer equipment to power the Copy Audit Touch software.

Featuring:

- * Alphanumeric options.
- * Color and monochrome copy tracking.
- * Export data directly into your Time & Billing Software.

Also Includes:

- * Seamless integration with Print Audit for tracking copy and print volumes.
- * Track additional costs such as postage, fax pages and other miscellaneous items.
- * Simple configuration and set-up.

Copy Audit Touch offers dozens of new features and enhancements, including color tracking, alphanumeric capabilities and flexible hardware options.

Automate your Cost Recovery Program:

- Track 100% of your walkup photocopying.
- Export collected data into any accounting system.
- Utilize user quotas, PIN codes and declining balances.
- Recapture additional costs with Copy Audit's manual scan, fax and postage tracking capabilities.

How it Works

-  1. User authenticates at Copy Audit Terminal using either a PIN code or optional card reader functionality.
-  2. Copy job is completed at the photocopier.
-  3. Job information (such as the user, number of pages, color information and more) is sent to a central database.
-  4. Reports can be generated at any workstation for billing purposes.

"COPY AUDIT IS EASY TO USE AND HAS PAID FOR ITSELF IN BOTH TIME SAVED BY OUR STAFF AND RECOVERED PHOTOCOPYING COSTS".
